

Ours Why spend a moment slogging through this awkward and self-conscious movie? Every now and then, after an hour of tedious plot and amateur acting, we start getting bits and pieces of the big band swing that made Tommy and Jimmy Dorsey, separately and together, the great musicians they were. Occasionally -- in a jam session with Art Tatum, with Tommy Dorsey and his orchestra doing "Marie" and, a standout, Jimmy Dorsey and his orchestra fronting Bob Eberle and Helen O'Connell singing "Green Eyes" -- we get a complete song. /> />Unfortunately, the movie is in the public domain and the DVD transfer is just as bad as the acting. My copy has only four chapter stops. That means you can get arthritis in your fast-forward finger trying to speed through to where the good stuff is. The swamp you're moving through is Hollywood's version of the life and battles of the two Dorseys. Tommy, superb on trombone, and Jimmy, superb on saxophone, usually couldn't stand each other. In 1935 they finally split, with Tommy starting his own orchestra. Each had greater success alone than they had achieved together. They reconciled when their father died in the Forties, which is where the movie ends. They later managed to tolerate each other in the orchestra led by Tommy as the big band era faded out in the Fifties. Tommy died in 1956 at age 51, vomiting in his sleep after booze, pills and a big meal. Jimmy died of cancer at 53 in 1957. Jimmy was hugely talented and, from all accounts, a reasonably easy-going guy. Tommy was hugely talented and, from all accounts, often an overbearing jerk. But good music makes up for a lot of faults, and the Big Band sounds the two created helped define the swing era. /> />They play themselves in the movie, and we see them develop from tussling tykes (with child actors) to grown men battling and yammering at each other. The movie is lumbered with not just their two parents, played by those Hollywood Irish clichés, Sara Allgood and Arthur Shields, who just want their boys to get along with each other, but also with a major sub-story involving a romance between Janet Blair, as a childhood friend of the Dorseys who becomes a vocalist with them and serves as a nearly full-time mediator and enabler, and William Lundigan, as a piano
